

COMPUTER NETWORKS

WEEK-1

LAB OBSERVATION

Shashank M S – 1BM21CS201

Outcomes:

- Theses practical activities provided us using Cisco packet tracer successfully and it helped us understand basic concepts of networking.
- We established connection with hub and then a switch, then integrated switch and hub and we pinged devices in real time mode.
- In simulation mode, we established connections and sent the packets of data which were visible clearly on how data was transferred.
- This helped us gain a lot of knowledge and know vast information and basics of hub and switch along with connections.
- It helped us gain broad information about networking.
